

The RHS - Point Right Assessment Interface - Sending plain XML

Sending a single MDS to PointRight and receiving results:

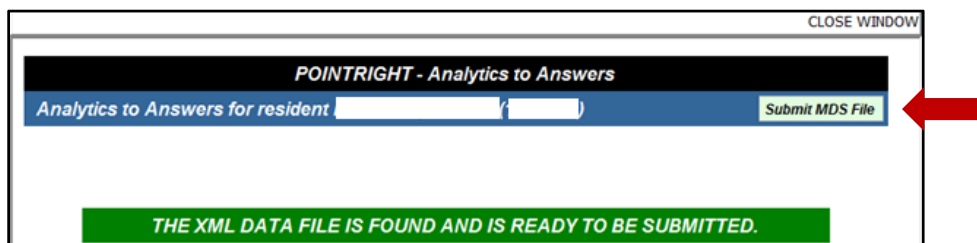

Within the MDS module click on “**Edit**” as shown below to open an MDS.

On the right side of the screen click on the “**Analytics**” button as shown below right to access the PointRight “Analytics to Answers” module.

Once the Analytics window is open click on “**Submit MDS File**” as shown below.

Once the data is submitted to PointRight, the following box appears showing that the submission was “Successful”. A report follows beneath it. (Note that the report does not appear in our illustration).

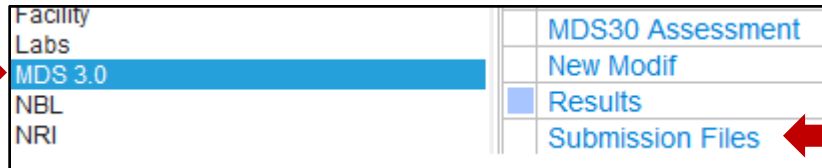

The RHS - Point Right Assessment Interface - Sending a ZIP File

Sending a batch of MDS records to PointRight and receiving results:

(A batch of XML files can be submitted as a single zip file but nested zip files are not supported.)

To send an MDS file to PointRight go to the Visual EMR module and click “Admin” on the top toolbar.

As shown below click on “MDS 3.0” and then on “Submission Files”.

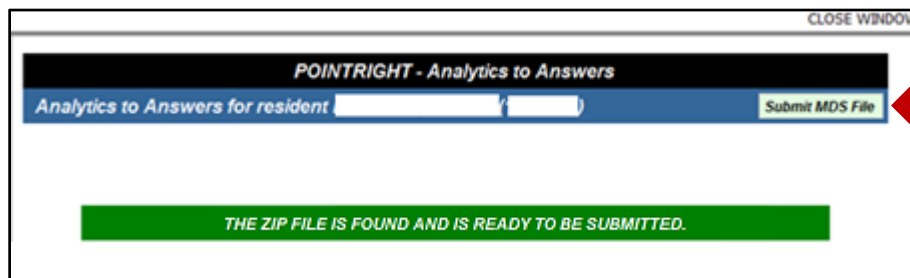

Select the appropriate month as shown below left.

Alongside an MDS batch click on “Submit Data for Analytics” as shown above right.

The submission window appears as follows:

Send the MDS batch file by clicking on “Submit MDS File” as shown above.

Once the MDS is submitted to PointRight, the following box shows that the submission was “Successful”.

A report showing the PointRight results appears. (The report does not appear in our illustration.)
